

PSYC*2740, Course Outline: Fall 2016

General Information

Course Title: Personality Psychology (PSYC*2740)

Course Description:

This course covers major theoretical and empirical contributions and empirical findings in Personality Psychology, with an emphasis on applied issues and real-world implications of research. For example, over the course of the term, we will discuss how personality plays a role in employment settings, relationships, stress, health, disease, mental illness, non-suicidal self-injury, and suicide. This will be accomplished through readings, lecture material, and in-class exercises. Over the term, you will also have the opportunity to apply your own ideas in the development of personality theories. You are encouraged to think critically about course content and issues discussed during lectures.

Credit Weight: 0.5

Semester Offering: Fall, 2016

Academic Department (or campus): University of Guelph, Main Campus

Class Schedule and Location: Tue & Thu 8:30AM– 9:50AM in MacNaughton, Room 105

Instructor Information

Instructor Name: Dr. Stephen P. Lewis

Email: stephen.lewis@uoguelph.ca

Office Location: 3001, MacKinnon Extension.

Office Hours: Tuesdays and Thursdays from 10:30AM until 11:30AM and by appointment.

TA Information

Name | Email: TBA

Name | Email: TBA

Name | Email: TBA

Name | Email: TBA

Name | Email: TBA

Course Content:

Specific Learning Outcomes:

Upon successful completion of this course, students should be able to:

1. Identify and delineate major personality trait theories and taxonomies.
2. Identify and delineate research approaches (correlational, experimental, case studies) used to study personality.
3. Identify issues related to reliability, validity, and measurement in personality assessment.
4. Identify and delineate 6 domains of human knowledge (dispositional, biological, psychoanalytic, cognitive-experiential, socio-cultural, and adjustment) in the context of personality.
5. Identify real-world implications of personality research in each domain of knowledge (e.g., how personality may affect health and mental health).
6. Develop a unique and specific operational definition for a voluntary human behaviour.
7. Develop two distinct and unique personality theories to logically account for a voluntary human behaviour.
8. Explain theoretical, empirical, and real-world implications (arguments) that would stem from a personality theory being completely true (i.e., accounting for ALL instances of a voluntary human behaviour).
9. Write a paper a clear and coherent paper presenting: a unique operational definition for a voluntary behaviour, logical personality theories, and sound arguments.

Lecture Content:

In the table below, please find an overview of lecture content, required readings, and important dates. Please note there is NO class on Tuesday, October 11.

*Lecture slides will be posted on Courselink by 5pm on the day prior to the lecture.

DATE	READINGS	CONTENT
September 8	NA	Course Overview + Paper Review
September 13	Chapter 1	Personality Psychology: An Introduction
September 15	Chapter 2	Personality Assessment, Measurement & Research Design
September 20	Chapter 3	Traits & Trait Taxonomies
September 22	Chapter 4	Theoretical & Measurement Issues in Trait Psychology
September 27	Chapter 5	Personality over Time: Stability, Change, & Coherence
September 29	Chapter 6	Genetics & Personality
October 4		MIDTERM 1

DATE	READINGS	CONTENT COVERED
October 6	Chapter 7	Physiological Approaches to Personality
October 13	Chapter 9	Psychoanalytic Approaches to Psychology
October 18	Chapter 10	Psychoanalytic Approaches: Contemporary Issues
October 20	Chapter 11	Motives & Personality
October 25	Chapter 12	Cognitive Topics in Personality
October 27	Chapter 13	Emotion & Personality
November 1	MIDTERM 2 (NON-CUMULATIVE)	
November 3	NA	Review of Paper + Serial Killer Film
November 8	Chapter 14	Personality & The Self
November 10	Chapter 15	Personality & Social Interaction
November 15	Chapter 16	Sex, Gender & Personality
November 17	Chapter 17	Culture and Personality **PAPERS DUE**
November 22	Chapter 18	Stress, Coping, Adjustment & Health
November 24	Lecture Slides	Personality & Mental Illness
November 29	Chapter 19	Disorders of Personality
December 1	Lecture Slides	Nonsuicidal Self-injury, Suicide, & Personality
December 12	Final Exam: 2:30PM – 4:30PM (NON-CUMULATIVE); LOCATION, TBA	

Course Assignments & Exams:

Exam/Assignment	Date Scheduled/Due	Weight	Learning Outcomes Assessed
Midterm 1	October 4 – in class	25%	1, 2, 4, 5
Midterm 2	November 1 – in class	25%	2, 3, 4, 5
Paper	November 17 – in class	20%	6, 7, 8, 9
Final Exam	December 12	30%	4, 5

[Exam Location will be posted online](#) later in the term and can also be found here:

<https://www.uoguelph.ca/registrar/scheduling/examschedulestudents>

Course Resources:

Required Texts:

Personality Psychology: Domains of Knowledge about Human Nature - 5th Edition

Authors: Randy J Larsen and David M Buss Publisher: McGraw-Hill (2014)

- There will be copies of our text available on reserve throughout the semester.
- Please note that exams will be based on the 5th Edition and not previous text editions
- **Textbook Learning Centre:** (website with chapter summaries + practice questions)

http://highered.mheducation.com/sites/007803535x/student_view0/index.html

Course Policies

- **Course Updates and Announcements**

Course updates and announcements will be posted on Courouselink; please check this regularly.

- **Lectures, Midterms, & Final Exams**

Classes follow a lecture/discussion format with discussion questions and in-class activities. They are designed to review, compliment, and augment text material. Some material presented in lectures will NOT be covered in the textbook and vice versa.

- **Students are responsible for text AND lecture material.**

You are encouraged to integrate text/lecture material; class attendance will facilitate an understanding of course material. It is recommended that you keep pace with the assigned readings in order to participate in class discussions and to prepare for exams.

General Information for Midterms & Final Exams

- All exams (i.e., midterms and final) will assessed using multiple-choice questions
- No text, notes, or other class material will be permitted at any point testing
- Midterms & the Final Exam will cover text AND lecture material

Specific Midterm Exam Information

- Midterm 1 is on October 4; Midterm 2 is on November 1
- You will have the entire class time to write your exam (i.e., 8:30AM to 9:50AM)
- Each midterm will comprise 60 questions and be worth 25% each
- Midterms cover material up to AND INCLUDING the last lecture before that exam
- Midterm 2 is non-cumulative (i.e., it will not cover Midterm 1 material).
- However, material builds throughout the term; what we cover early in the term facilitates understanding of newer material.

Specific Final Exam Information

- Our final exam is on December 12, 2016 from 2:30PM until 4:30M
- The final exam is non-cumulative but it is more comprehensive than the midterms as it covers more material; it covers all material since Midterm 2
- The final will comprise 80 questions and is worth 30% of the final grade in the course

In-Class Exam Reviews

- We will do reviews for midterms & the final at the end of the class prior to each exam. This will involve coverage of exam material and practice questions.

Missed Midterm Examinations

When a midterm is missed, contact Dr. Lewis via email. Consistent with University Policy, students who miss a midterm must provide an original copy of appropriate documentation. Reasons for a missed midterm can be found through the link below (University Policies: Academic Consideration). With appropriate documentation, a make-up exam session will be scheduled and invigilated by a TA. Without appropriate documentation, you will receive a grade of 0% on that exam. If you know you will miss a midterm ahead of time, please contact me in advance. I am usually understanding of extenuating circumstances.

Missed Final Examinations

According to University policy, final exams are rescheduled via Academic Counselling. Hence, you should contact them directly should you not be able to write the final exam. Please be sure to review your exam schedule prior to making travel arrangements for the end of term; this does not constitute a reason for missing a final exam according to University Policy.

Papers

All students are required to submit a personality paper (due November 17). All paper requirements can be found under "Additional Course Information," below.

Late Papers

As stated below, papers received after the deadline (9:50AM on November 17) will receive a reduction of 10% per calendar day. After 5 calendar days, the grade will be 0%. If you submit a hardcopy OR an e-copy (without having already submitted your hardcopy) after 9:50AM on November 17, the paper is considered late.

Course Policy regarding use of electronic devices and recording of lectures

Electronic recording of classes is expressly forbidden without consent of the instructor. When recordings are permitted they are solely for the use of the authorized student and may not be reproduced, or transmitted to others, without the express written consent of the instructor.

University Policies

Academic Consideration

When you find yourself unable to meet an in-course requirement because of illness or compassionate reasons, please advise the course instructor in writing, with your name, id#, and e-mail contact. See the academic calendar for information on regulations and procedures for

Academic Consideration:

[Academic Consideration, Appeals and Petitions](#)

Academic Misconduct

The University of Guelph is committed to upholding the highest standards of academic integrity and it is the responsibility of all members of the University community, faculty, staff, and students to be aware of what constitutes academic misconduct and to do as much as possible

to prevent academic offences from occurring. University of Guelph students have the responsibility of abiding by the University's policy on academic misconduct regardless of their location of study; faculty, staff and students have the responsibility of supporting an environment that discourages misconduct. Students need to remain aware that instructors have access to and the right to use electronic and other means of detection. Please note: Whether or not a student intended to commit academic misconduct is not relevant for a finding of guilt. Hurried or careless submission of assignments does not excuse students from responsibility for verifying the academic integrity of their work before submitting it. Students who are in any doubt as to whether an action on their part could be construed as an academic offence should consult with a faculty member or faculty advisor.

The Academic Misconduct Policy is detailed in the Undergraduate Calendar:

[Academic Misconduct Policy](#)

- **Accessibility**

The University of Guelph is committed to creating a barrier-free environment. Providing services for students is a shared responsibility among students, faculty and administrators. This relationship is based on respect of individual rights, the dignity of the individual and the University community's shared commitment to an open and supportive learning environment. Students requiring service or accommodation, whether due to an identified, ongoing disability or a short-term disability should contact the Centre for Students with Disabilities as soon as possible.

For more information, contact CSD at 519-824-4120 ext. 56208 or email csd@uoguelph.ca or see the website: [Student Accessibility Services Website](#)

- **Course Evaluation Information**

Please refer to the [Course and Instructor Evaluation Website](#)

- **Drop date**

The last date to drop one-semester courses, without academic penalty, is Friday November 4, 2016. For regulations and procedures for Dropping Courses, see the Academic Calendar: [Current Undergraduate Calendar](#)

Additional Course Information

Personality Papers

Overview: The purpose of the paper is to develop **your own** theories in order to account for a behaviour of your choosing; from here, you will “argue from” one of these theories. **Lecture 1 and Chapter 1 of your text contain information that might be useful when developing a theory and many of our class discussions may help prompt ideas.** When writing the paper, you will learn the following skills, namely, to: a) operationally define a voluntary human behaviour, b) apply critical thinking skills and develop personality theories in order to explain or account for that behaviour and, c) argue from one of the theories as described below by discussing implications for the theory should it be 100% true (explained further below).

Help For Papers

All students in the class are assigned a TA. This way, you will have two people (Dr. Lewis and your specific TA) to directly contact about your paper should you want to ask questions about the paper and/or meet about your paper as you work on it. We will also have a paper review session on November 3 (in class). Assigned TAs will be confirmed and posted on Courselink during the week after the course add-period (i.e., once course enrollment is confirmed).

Paper Drafts

Due to the size of our class, paper drafts will NOT be reviewed. However, you are encouraged to ask questions and run your ideas by Dr. Lewis and your assigned TA. We are **always** happy to answer questions and help guide your paper if you are having difficulty with it.

Guide to Starting Your Paper

First, pick a behaviour

- First, choose a voluntary human behaviour. Non-voluntary acts (e.g., yawning, laughing) cannot be the focus of your paper. Similarly, you should not write about the absence of an explicit act – that is not doing something (e.g., avoiding situations, procrastinating). Only voluntary acts are permitted for this paper.
- Mental illnesses (e.g., anorexia), emotions (e.g., sadness) or thoughts (e.g., doubting oneself) are not behaviours and **cannot** be the focus of your paper. However, if you wanted to use a clinical topic in your paper, you could write about a behavior associated with mental illness (e.g., hoarding, binge-eating, purging). If you elect to do this, be sure to take focus away from the mental illness itself and simply focus on the behaviour. If you have questions about your paper topic, please ask Dr. Lewis, or your assigned TA.
- When selecting your behaviour, you are encouraged to pick something that interests you. For example, you might be interested in running, painting, shopping, or doing yoga. Maybe you’re interested in a more clinical behaviour such as self-injury, drug use, drinking, gambling, or binge eating. It can be anything at all -- not just these examples. More complex behaviours are better suited for the paper and will make your task much easier. Writing about something mundane (e.g., having a bowl of cereal in the morning) may not be conducive to critical thinking and the development of unique theories (using a mundane act may make your task

more difficult than necessary).

After selecting a behavior, ALL papers must adhere to the following 4-paragraph format

Paragraph 1: 4 Points out of 20

- In the first paragraph, provide your own narrow (i.e., specific) operational definition for your chosen behaviour. This is an important skill to develop in psychology. Indeed, researchers need to have a *very clear and specific definition* for a topic of interest. When you define your behavior, you should avoid being broad/general. Rather, be **VERY SPECIFIC** with your definition. The definition must be **your own** (not one from another source). To make your behaviour specific, you will need to address various features of the behavior (e.g., how often it occurs, how long it lasts, where it occurs, etc.) These are just some questions you SHOULD address when applying them to your own definition.
- **EXAMPLE:** If you selected drinking alcohol you would need to go beyond saying that that your behaviour is “drinking alcohol.” Rather, you would *narrowly define* drinking alcohol so that others know **exactly** what you mean. **Again, the key is to be specific and to make the definition your own.** Taking this example, you would want to address the features of the behavior. As such, you would want to consider the following questions: How much alcohol is consumed exactly (e.g., 1 drink, 6 drinks, or 12 drinks...the number you choose is up to you but be specific)? How often does it occur (e.g., daily, monthly)? What type of alcohol (e.g., beer, liquor or wine)? In what contexts does it occur (e.g., socially, alone)? By addressing these features of your behaviour, you will have a specific and clear definition.
- **The more specific you are, the better quality your definition, and the easier it will be to develop good theories. You should not focus on consequences of the behavior or reasons for the behavior at this stage of the paper.**

Paragraphs 2 and 3: 3.5 Points each out of 20 (Total = 7)

- **Here, pick TWO DISTINCT personality traits.** *There will be a list of trait-adjectives on CourseLink to help if you get stuck.* However, this list is far from exhaustive; there are literally thousands of possible trait-adjectives from which to choose (don't worry, you don't have to know them all!). If you are unsure whether you have selected a trait, please contact Dr. Lewis or your assigned TA.
- From here, you will use one trait in Paragraph 2 and the other in Paragraph 3. The objective in each paragraph is to discuss how the trait works to explain or account for the behaviour you selected and defined in Paragraph 1. It is insufficient (and incorrect) to say that the trait alone leads to or causes the behaviour. As we will discuss in class, no one trait *causes* behaviour. Rather, traits work with other variables/factors to lead to behaviours. By putting the trait together with different variables/factors to explain how YOU think the behaviour could occur, you are developing theories. Your task is to develop 2 **DISTINCT** theories – one for Paragraph 2, the other for Paragraph 3. Thus, the factors in each theory should not overlap at all (aside from the behavior, of course).
- It may help to think of your theory as a pathway. In this way, the destination is the behavior. The trait is just one of several different steps along the path leading to the behaviour. So, if you are making 2 theories, think of them as two different paths to the same destination.
- Many theories will begin with the trait (as in the example, below). However, this is not necessary. Some theories will have the trait implicated later in the theory (such that other variables precede the trait). This is perfectly fine; what you do depends on your ideas. It is also

okay to use more than 1 trait in either (or both) of your theories. However, if you do this, you'll want to make sure you avoid overlap. For example, if you used gregariousness and impulsivity in your first theory, you would not use either trait (or similar traits) in your next theory. Bear in mind that theories will also require more than just traits.

A Guide To Writing Good Theories:

- **Theories need to apply to multiple people.** Avoid referring to one individual when writing your theories. Instead refer to *people* or *individuals* when writing your theories. Theories should apply to more than one person - otherwise you have a case study.
- **Theories must be based on your ideas; no outside sources or references can be used.**
- **Good theories must be clear and coherent.** Theories should logically outline how the behavior you defined in Paragraph 1 occurs. Thus, readers should be able to clearly see how different variables (including your trait) work together to lead to the behaviour. For instance, in the example below, if we did not have “susceptibility to peer pressure” as a final variable in the theory, there would be a missing step (it wouldn't be entirely logical). Indeed, not all people who are peer pressured succumb to this pressure.
- To help link together theory components, “if, then” statements may help. For example, you could say that if X happens, then this may lead to Y. And if that happens, then this may lead to Z. However, using “if, then” statements alone may not yield a good theory. The variables you are linking together must logically and clearly cohere. **Again, you will need more than just traits in your theories.**
- **EXAMPLE:** Using drinking alcohol as the behaviour, you might write about how the trait of gregariousness (a component of extraversion) leads to drinking alcohol (in the way it was defined). You could say that since people with high levels of gregariousness tend to be quite social, they may also have more friends. If this is the case, then they may want to socialize more in public places. As bars are often a venue for people to socialize, this may represent one place that these individuals go. When there, these individuals may see others drinking; they may also have friends who start to drink heavily. If this occurs, they may experience peer pressure to drink (in the way it was defined). However, not everyone is susceptible to peer pressure. Thus, if drinking were to occur (as defined), these individuals **must also** be susceptible to the peer pressure. *As you can see, it's not just the trait that leads to the behaviour; other variables play a role.*
- Putting this together as if it were a pathway: If people are high gregariousness (Step 1), then this might lead to having more friends (Step 2) as gregarious people are social and outgoing. If this happens, then these individuals may go to bars with their friends as bars represent a common place for people to socialize (Step 3). When out with these friends at a bar, individuals high in gregariousness may begin drinking. It may be that some of their friends are drinking heavily. If this happens, then individuals who are high in gregariousness may feel pressured to drink more (Step 4). If these individuals experience peer pressure to drink more and they are also susceptible to this pressure (Step 5), then this might lead to drinking alcohol in the way it was defined (Step 6).

Paragraph 4: 4.5 Points out of 20

- **Now, pick just ONE of your two theories.** Your task here is to write about what it would mean if THIS theory were actually true and thus accounted for ALL instances of the behaviour you defined in Paragraph 1. Of course, no theory will account for all instances of any

behaviour; but, what if it did? What might his mean? Arguing from theory is a difficult, albeit critical, skill in psychology. This is not just repeating the theory – you’ll want to address the issues outlined below.

A Guide To Providing Good Arguments From Theory in Paragraph 4:

- Please use the future tense in this paragraph, as you should be speculative here (i.e., say what it could or might mean if your theory were true). When writing this paragraph, first indicate which theory you are assuming to be one hundred percent true (and that accounts for every occurrence of your behaviour, as it was defined).
- **Next, and in order to effectively argue from theory, you must to effectively discuss ALL of the following (note there are 2 key questions to address for each of the theoretical, research, and real-world issues below):**
 - Theoretical Issues
 - What does it mean if your theory is 100% true? In other words, assume that your theory accounts for ALL instances of your behavior. Adopting this perspective, what would this conclusion logically suggest about the theory (and its components)?
 - What does this mean about the other theory (or any other theory)?
 - Research Issues
 - What might you expect research to indicate if the theory you chose to write about were 100% true (i.e., if your theory were researched, what are some of the findings you might expect)?
 - If the theory were true, what would you NOT expect research to indicate?
 - Real-world Implications/Applications
 - What are the consequences associated with the theory and behaviour you wrote about? For instance, if the behaviour is positive (e.g., studying), what are the possible (& logical) outcomes that might come from people doing this? If it is negative (e.g., cocaine use), what are the possible (& logical) outcomes that might come from people doing this?
 - Are there any real-world (and again, logical) implications stemming from your theory? So, if your theory leads to a positive behaviour, how can you go about promoting it? If your theory leads to a negative behaviour, how might you go about discouraging (and even stopping) the behaviour?
- **EXAMPLE:** Let’s say you’ve now developed 2 theories leading to drinking and that you’ve picked the theory on gregariousness to focus on in this paragraph. First, you’d need to state that this is theory you chose to write about. From here, you’ll want to address the above items. As noted above, keep in mind that it is not just the trait that leads to the behavior. **It is all of the components of your theory (not just one or two).** So, if all of the steps in the theory were to lead to all instances of drinking (in the way it was defined), what would this mean from a theoretical perspective (drawing on the above items)? What would it mean in terms of research implications (drawing on the above items)? And, what are some of the real-world implications that would stem from your theory? (again, drawing on the above items). When coming up with ideas, keep in mind that it is the ENTIRE theory that leads to the behavior and you are assuming that this theory is the ONLY way for the behavior to happen.

Grammar/Style/Quality of Writing: 4.5 Points out of 20

- As with any paper in university, proper grammar, style and quality of writing (including, clarity, concision and good flow of ideas) are important; please refer to paper requirements (below) for additional information on grammar, style and writing.

<u>RECAP OF PAPER EVALUATION</u>	
Paragraph 1:	4.0 Points
Paragraph 2:	3.5 Points
Paragraph 3:	3.5 Points
Paragraph 4:	4.5 Points
Grammar/Style/Quality of Writing:	4.5 Points
Total:	20.0 Points

Paper Submissions, Deadlines, & Late Policy**PAPER SUBMISSION & DEADLINE**

- **Everyone MUST submit papers in BOTH printed and electronic formats**
- **A typed & printed copy MUST be submitted BY THE END OF CLASS on November 17.** If we end class early, please bring the paper to my office by this time (i.e., 9:50AM).
- **An electronic copy must be submitted via Dropbox on Courselink no later than November 17 at 11:59PM.**
- **YOU CANNOT SUBMIT AN ELECTRONIC COPY BUT NOT A PAPER COPY OR VICE VERSA.**
- Papers must reflect your own work. Please see University Policy section of syllabus regarding academic misconduct. Students are responsible for knowing this information.

LATE PAPERS

- **Papers received after the deadline (9:50AM on November 17) will receive a reduction of 10% per calendar day. After 5 calendar days, the grade received will be 0%.**
- **If you submit a hardcopy OR an e-copy (without having already submitted your hardcopy) after 9:50AM on November 17, the paper is considered late.**
- **As the paper is assigned at the start of the term, extensions are not permitted.**

Paper Requirements

PAPER LENGTH

- **The paper should be** approximately 4 DOUBLE-SPACED page. The page limit does NOT include the title page
- **Do NOT add extra spaces between paragraphs (double spaced only throughout)**
- **Do not exceed 4-paragraphs, even if you have a paragraph that seems long.**
- **You do not need an introductory and/or closing paragraph (just the above 4 paragraphs)**
- **Do not use broad, philosophical introductory sentences** (e.g., “People have consumed alcohol for centuries....” “People from all over the world engage in behaviors”)

PAPER FORMAT

- Please use 12-point font (**Times New Roman or Arial**) & print in **black** ink only
- All margins **MUST** be 1-inch (2.54 cm)
- **There should be no headings in the paper (e.g., no headings for paragraphs)** Please number each page (including the first page)
- **All papers must adhere to the 4-paragraph outlined above**
- **An APA Title Page is required (this is NOT part of the 4-pages noted, above); this should include:** title, name, student number, course name & number, running head. If you need to, consult an APA (6th Edition) manual to help.

WRITTEN STYLE

- Write in **third person only** (there should be NO first or second person at all)
- Papers are to be **formally written**. Psychology is a science so please write as such (no colloquial statements, no slang, no contractions, the paper shouldn’t read like a story, etc.)
- Do not list the steps in your theories as steps this was done in the example above to illustrate different theory components
- **Please do not use past tense when writing your theories or arguing from theory in the final paragraph.** Since you are developing theories and arguing from one of them, you should be more speculative when you write. **Please use future tense here instead.**
- **You cannot use the above example or an analogous one (e.g., changing the behavior but keeping the rest of the theory or slightly modifying a step or two). All theories MUST reflect YOUR ideas.**

USE OF CITATIONS

- **You CANNOT (nor do you need to) use references or outside material.** As you are developing your own definition and theories, you do not need to consult outside material; thus, no references should be used in your paper.

SUBMITTING E-COPIES

- E-copies of papers are required by 11:59pm on November 17 and must be submitted via Dropbox in .doc, docx, or .pages format only. Please do NOT submit the paper as a PDF

Bonus Points: Brief Article Reflections

Over the course of the semester, each student will have the opportunity to earn up to 2 bonus points. All bonus points will be added to the final (overall) grade once it is computed. By no means is this mandatory (these are entirely optional).

Brief Article Reflections

To write these, you will need to read a BRIEF article related to personality (these will also relate to some of the content covered in class). From here, reflect on what you've read in the article and talk about what you thought about it (you can draw on your opinions, your knowledge, etc.). Next, discuss any strengths or weaknesses of the arguments made in the article (e.g., why was something a strength or weakness).

Each reflection should be written in your own words and should be about 200 words; of course, you may exceed this.

Each reflection will be worth 1%. You can write up to 2 reflections over the term. To access the articles, please go on Courselink and look under Content (Section entitled: "Bonus Points").

Reflections can be submitted any time from September 19 until December 2nd at 11:59pm (when classes conclude for the semester)

Reflections can only be submitted via Dropbox and must be submitted individually (i.e., 1 reflection per Dropbox folder).

As this is a bonus assignment, no extensions are permitted.

Please use 12-point font (Arial or Times New Roman) and include your name and student number on each reflection. Please use doc, docx, or .pages files (no PDF).

You do not need a title page for these and APA style is not required for a bonus assignment.
