

# **PSYC\*3100, Course Outline: Fall 2015**

## **General Information**

**Course Title: Evolutionary Psychology**

### **Course Description:**

Evolutionary psychology is often described as an approach to psychology rather than a specific branch of psychology (so it would be more like behaviorism than, say, social psychology). It begins from the premise that just as our bodies have evolved by the process of natural selection, our minds have so evolved. So, just as our eye is an adaptation produced by a historical, biological process of adaptation over stretches of evolutionary time, the mind and at least some of its various functions have been shaped by historical processes that have “designed” it for solving specific information processing problems. While there is wide agreement that evolution matters to psychology, it may matter in a number of ways. We shall examine a number of key ways in which it is thought to matter, developing a basic competence in Darwinian, evolutionary thinking, and looking to its application in areas such as sex differences, familial relationships, social life, emotion, and culture. The main learning outcome of this course: to provide the student with tools to think about the role of evolution in the understanding of cognition.

### **Academic Misconduct**

The University of Guelph is committed to upholding the highest standards of academic integrity and it is the responsibility of all members of the University community, faculty, staff, and students to be aware of what constitutes academic misconduct and to do as much as possible to prevent academic offences from occurring.

University of Guelph students have the responsibility of abiding by the University's policy on academic misconduct regardless of their location of study; faculty, staff and students have the responsibility of supporting an environment that discourages misconduct. Students need to remain aware that instructors have access to and the right to use electronic and other means of detection. Please note: Whether or not a student intended to commit academic misconduct is not relevant for a finding of guilt. Hurried or careless submission of assignments does not excuse students from responsibility for verifying the academic integrity of their work before submitting it. Students who are in any doubt as to whether an action on their part could be construed as an academic offence should consult with a faculty member or faculty advisor.

The Academic Misconduct Policy is detailed in the Undergraduate Calendar:

## **Accessibility**

The University of Guelph is committed to creating a barrier-free environment. Providing services for students is a shared responsibility among students, faculty and administrators. This relationship is based on respect of individual rights, the dignity of the individual and the University community's shared commitment to an open and supportive learning environment. Students requiring service or accommodation, whether due to an identified, ongoing disability or a short-term disability should contact the Centre for Students with Disabilities as soon as possible.
